PROFILE

Mid-Level Frontend Developer with 3+ years of professional experience building responsive and user-centric web applications. A University of Mansoura graduate (BSc in Computer Science, Very Good) skilled in transforming designs into high-quality code. A collaborative team player eager to tackle complex challenges and contribute to innovative projects.

PROFESSIONAL EXPERIENCE

Neop 09/2024 – Present

Mid-Level Frontend Developer

Contributed to the development of dashboards, landing pages, and full-featured websites using modern front-end technologies. Built **landing pages** with **native HTML, Sass, Tailwind CSS, and JavaScript**, developed **interactive dashboards** in **Vue 3** within a **Laravel** environment, and created **dynamic websites** using **Nuxt 3** for optimal performance and scalability. Worked following **Agile methodologies**, collaborating with cross-functional teams through sprints and daily stand-ups to deliver high-quality, responsive user interfaces.

Spider-te8 07/2022 – 08/2024

Junior Frontend developer

Gained hands-on experience at a fast-paced startup, developing diverse projects for Saudi clients—from high-conversion landing pages to functional e-commerce platforms.

PROJECTS

Retm – Social Media Management Platform

Vue 3, Tailwind CSS

Developed a full-featured web platform enabling users to manage multiple social media channels from a single dashboard. Implemented post scheduling, content planning with real-time post previews and performance tracking using API integrations. Focused on responsive design and a seamless cross-platform experience aligned with the mobile app.

Masra— Logistics & Transport Platform

Vue 3, Nuxt 3, Nuxt Ui, in

Developed a comprehensive logistics platform designed to simplify and optimize shipping operations. Built two dynamic dashboards — **Admin** and **Carrier** — using **Vue 3**, enabling real-time shipment tracking, route optimization, and performance management. Also developed a **fully functional web platform with Nuxt 3**, offering the same features as the mobile application, ensuring a seamless experience across devices.

Bawani Elsharq

Vue Js, Vuetify, Bootstrap, Sass, integrate with api

An e-commerce website for furniture with two ways to shop: buy items directly or fully customize them. The built-in tool lets users personalize their furniture, see a real-time visual preview, and get an instant price quote.

UrWater Website

Vue Js, Vuetify, Bootstrap, Sass, integrate with api

A responsive web application designed to streamline the process of ordering and tracking water deliveries. The system intelligently assigns orders to the closest available representative using location data, minimizing delivery times. Customers can track their order in real-time on an interactive map.

Telegrams KSA website

Nuxt 3, Vuetify, Tailwind Css, integrate with api

A web application that allows users to send physical telegrams worldwide. The platform handles the entire process, from composing and formatting messages according to postal standards to payment processing and logistics coordination for delivery.

ORGANISATIONS

CIS Team — Mansoura University

02/2020 – 09/2023

Member (PR, UI/UX, Android, and Frontend Circles)

Participated in multiple technical and creative circles, starting in **Public Relations** and **UI/UX**, then expanding into **Android development** and finally **Frontend development**. Gained hands-on experience collaborating with diverse teams, enhancing both communication and technical skills.

IEEE Mansoura Student Branch

01/2021 – 11/2022

PR Member → Secretary

Joined the **Public Relations** team to promote events and engage with the student community, later appointed as **Secretary**, managing team coordination, meeting documentation, and internal communication. Developed strong leadership, organizational, and teamwork abilities through active involvement in student activities and tech initiatives.
